

A photograph of a sunset over a field of tall grass. The sun is low on the horizon, creating a warm, golden glow. A dirt path winds through the grass towards the horizon.

Join us on our sustainability journey

At Solutions2 we understand that the exhibition industry can have a significant environmental impact. That's why we've been dedicated to reducing our carbon footprint and transforming the way we operate since 2019.

We partner with independent consultants, Green Circle Solutions to audit our practices, implement meaningful changes and continuously improve and invest in how we manage materials, processes, haulage, energy, staff, waste, and utilities. We believe in transparency and

accountability; our sustainability plan, promise, and policy are available to all our clients and we are delighted to have been classed Tier 4 of the Event Supplier and Services Association's (ESSA) sustainability accreditation.

Our mission? To achieve net zero by 2040. We know this is a long-term commitment, but we're making steady progress through responsible, sustainable changes. Together with our clients and suppliers, we're building a greener future for the events industry.
